

SATELLITE DISH AND ANTENNA POLICY

Lumberton Housing Authority

- A. A resident of HACL unit has a right to install a satellite dish receiving antenna within the leased premises. The HACL imposes the following reasonable restrictions to which the resident must comply as allowed under the rules of the Federal Communications Commission.
1. **Number and Size.** Resident may install only one satellite dish or antenna within the premises that are leased to the Resident for Resident's exclusive use. A satellite dish may not exceed 39 inches (1 meter) in diameter. An antenna or dish may receive but not transmit signals.
 2. **Location.** Location of the satellite dish or antenna is limited to (1.) inside resident's dwelling, or (2) in an area outside resident's dwelling such as resident's balcony, patio, yard, etc. of which Resident has exclusive use under lease. Installations at multi-unit complexes are not permitted on any parking area, roof, exterior wall, window, fence, or common area, or in an area that other residents are allowed to use. A satellite dish or antenna may not protrude beyond the vertical and horizontal space that is leased to Resident for Resident's exclusive use. Residents of single-family units may install a satellite dish or antenna on the exterior of the building where no rear yard or exterior balcony exists.
 3. **Safety and Non-Interference.** Resident's installation: 1) must comply with reasonable safety standards; 2) may not interfere with the HACL's cable, telephone, or electrical systems or those of neighboring properties; 3) may not be connected HACL's telecommunications systems; and 4) may not be connected to HACL's electrical system except by plugging into a 110-volt duplex receptacle. If the satellite dish or antenna is placed in a permitted outside area, it must be safely secured by one of three methods:
 - Securely attaching to a portable heavy object
 - Clamping it to a part of the building's exterior that lies within Resident's premises (such as a balcony or patio railing)
 - Any method approved by the HACL.

(No other methods are allowed. The HACL may require that Resident block the satellite dish or antenna with plants, etc., so long as it does not impair Resident's reception.)
 4. **Signal transmission from exterior dish or antenna to interior of dwelling.** Resident may not damage or alter the leased premises and may not drill holes through outside walls, door jams, windowsills, etc. If Resident's satellite dish or antenna is installed outside of resident's living area (on balcony, patio or yard of which Resident has exclusive use under lease), signals received by Resident's satellite dish or antenna may be transmitted to the interior of Resident's dwelling only by 1) running a "flat" cable under a door jam or window sill in a manner that does not physically alter the premises and does not interfere with proper operation of the door or window; 2) running a traditional or flat cable through a pre-existing hole in the wall (that will not need to be enlarged to accommodate the cable); or 3) any other method approved by HACL.
 5. **Workmanship** For safety purposes, Resident must obtain the HACL's approval of: 1) strength and type of materials to be used for installation, and 2) the person or company who will perform the installation. A qualified person or company that has worker's compensation insurance must do installation. The HACL's approval will not be unreasonably withheld. Resident must obtain permits required by local ordinances for the installation and comply with any applicable local ordinances and state laws.
 6. **Maintenance** Resident will have the sole responsibility for maintaining Resident's satellite dish or antenna and all related equipment. The HACL may temporarily remove the satellite dish or antenna if necessary to make repairs to the building.

7. **removal and damages.** Resident must remove the satellite dish or antenna and all related equipment when Resident moves out of the dwelling. Resident must pay for any damages and for cost of repairs or repairing which may be reasonably necessary to restore the leased premises to its condition prior to installation of resident's satellite dish or antenna and related equipment.
8. **Liability insurance and indemnity.** Resident is fully responsible for the satellite dish or antenna and related equipment. Prior to installation, resident must provide the HACL with evidence of liability insurance to protect HACL against claims of personal injury to others and property damage related to Resident's satellite dish, antenna and related equipment. The insurance coverage must be no less than \$100,000 (which is an amount reasonably determined by the HACL to accomplish that purpose) and must remain in force while the satellite dish or antenna remains installed. Resident agrees to defend, indemnify and hold HACL harmless from the above claims by others.
9. **When resident may begin installation.** Resident may begin installation of the satellite dish or antenna after Resident has 1) signed the lease addendum incorporating this language; 2) provided HACL with written evidence of liability insurance referred to in paragraph 8 above; 4) received the HACL's written approval of installation of the materials and the person or company who will do the installation. Resident is required to comply with these restrictions as a condition on installing such equipment.

B. Damage/ Security Deposit. The Housing Authority City of Lumberton requires a damage/security deposit for the satellite dish or antenna. The deposit is one hundred dollars (\$100.00) and is intended to help protect the HACL against possible repair costs, damages, or any failure to remove the satellite dish or antenna and related equipment the time of move-out. This deposit does not imply a right to drill into or alter the leased
